Summary

Full-stack developer and data science enthusiast pursuing B.Tech in CSE (AI/ML) with experience in building production-grade applications. Experienced in building and debugging scalable full-stack applications and machine learning systems. Self-driven problem solver with hands-on experience in real-world product development and the ability to contribute independently in fast-paced environments.

Technical Skills

Programming Languages: Python, C++, Java, JavaScript

Frontend Development: React, Angular, Tailwind CSS, Moment.js, Highcharts, Handsontable

AI/ML & Data Science: Tensorflow, Scikit-learn, NumPy, Pandas, Matplotlib

Backend & Databases: Django, PostgreSQL

Tools & Platforms: Git, GitHub

Core Concepts: Data Structures & Algorithms, Object Oriented Programming, Cloud Computing

Experience

Software Developer Intern – DJUBO, Noida, Uttar Pradesh

Jan 2026 – Apr 2026

Contributed to development and debugging of production systems across frontend and backend. Worked on feature implementation, issue resolution, and improving system performance within a real-world startup environment.

Projects

Fenero – Capital Advisory Platform [Live Deployment]

Oct 2025 – Present

Built a production-grade financial advisory platform managing client onboarding and bank matching workflows. Integrated AI chatbot support using Gemini API with Grok and OpenRouter fallback APIs. Deployed backend services on Render with automated cron-job backend pinging for uptime stability. *Tech Stack: ReactJS, CSS, Flask, Gemini API, Grok API, OpenRouter API, Render.*

Parkinson's Prediction Using Voice Recognition [GitHub]

Apr 2024

Developed a machine learning model achieving 92%+ accuracy for early Parkinson's disease detection using voice analysis. Applied SHAP and LIME explainability techniques to improve prediction reliability and interpretability. *Tech Stack: Python, Scikit-learn, Pandas, NumPy.*

Landslide Detection Using Satellite Imagery [GitHub]

Oct 2024

Developed an image-processing pipeline for detecting landslide-prone regions using satellite imagery and segmentation techniques. *Tech Stack: Python, OpenCV, NumPy.*

Education

VIT Bhopal University, Bhopal, MP

2023 – Present

B.Tech in Computer Science Engineering (AI & ML Specialization)

G.D. Goenka Public School, Ghaziabad, UP

2018 – 2023

Class XII – Science (Mathematics, Computer Science)

Certifications

Applied Machine Learning – University of Michigan (Coursera)

Data Science – LaunchEd Global

Cloud Computing – NPTEL

AI & Data Science Virtual Internship – Lloyds Banking Group (Forage)
