Summary

Full-stack developer and data science enthusiast pursuing B.Tech in CSE (AI/ML) with experience in building production-grade applications. Skilled in developing real-world business platforms, machine learning systems, and scalable web solutions.

Technical Skills

Programming & Web: Python, C++, Java, JavaScript, HTML, CSS

Frameworks & Libraries: React, Flask, NumPy, Pandas, Matplotlib, Scikit-learn, SHAP, LIME

Databases & Tools: SQLite, PostgreSQL, Git, GitHub, Jupyter Notebook, VS Code

Cloud & Deployment: Vercel, AWS

Projects

Fenero – Capital Advisory Platform [Live Deployment] *Oct 2025 – Present*

React, Vite, JavaScript, Python, Flask, SQLite, Vercel

Developed a full-stack financial advisory platform for a registered Capital Advisory LLP serving clients in debt syndication (50+ crores), investment banking, and virtual CFO services. Built a responsive React frontend with intelligent bank matching, secure client portal, and admin dashboard.

Parkinson's Prediction Using Voice Recognition [GitHub] *Apr 2024*

Python, Random Forest, SHAP, LIME, Scikit-learn

Built a machine learning system analyzing vocal features for early Parkinson's detection, achieving 92%+ accuracy. Implemented explainable AI techniques (SHAP, LIME) for medical interpretability and robust feature engineering.

Landslide Detection Using Satellite Imagery [GitHub] *Oct 2024*

Python, NumPy, Pandas, OpenCV

Created an automated image-processing pipeline to identify landslide-prone regions using pixel intensity analysis and satellite data segmentation.

Experience

Software Developer Intern – Djubo *Jan 2026 – Present*

Frontend, Backend, Product Engineering

Working on software development and product engineering tasks across frontend and backend systems. Gaining hands-on experience with production-level workflows, scalable architectures, and collaborative feature development in a real-world startup environment.

Education

VIT Bhopal University, Bhopal, MP *2023 – Present*

B.Tech in Computer Science Engineering (AI & ML Specialization)

G.D. Goenka Public School, Ghaziabad, UP *2018 – 2023*

Class XII – Science (Mathematics, Computer Science)

Certifications

Applied Machine Learning – University of Michigan (Coursera)

Supervised learning, model evaluation, and practical ML workflows

Data Science – LaunchEd Global

Training in Python, NumPy, Pandas, and ML workflows

Cloud Computing – NPTEL

AI & Data Science Virtual Internship – Lloyds Banking Group (Forage)
