SUMMARY

AI Engineer, Machine Learning Engineer, and Full Stack Developer pursuing B.Tech in Computer Science with specialization in Artificial Intelligence and Machine Learning at VIT Bhopal University. Strong expertise in Machine Learning, Deep Learning, Computer Vision, NLP, and Full Stack Development with hands on experience in implementing ML algorithms from scratch, building scalable production systems, and adapting to emerging technologies.

EXPERIENCE

Indian Institute of Technology Delhi

June 2026 – Present

Machine Learning Research Intern

Delhi, India

Working under Prof. Tapan Kumar Gandhi on advanced medical image segmentation research.

- Working on medical imaging and computer vision research involving multimodal retinal image segmentation for ophthalmology applications.
- Developing end to end deep learning pipelines involving preprocessing, augmentation, segmentation, feature extraction, and mask generation.
- Optimizing segmentation performance using hyperparameter tuning and evaluation metrics including IoU and Dice coefficient.

DJUBO

Jan 2026 – Apr 2026

Software Developer Intern

Noida, India

Full stack development using AngularJS and Django REST Framework. (Repository)

- Built a large scale employee attendance management platform using AngularJS, Django REST Framework, SQLite, and token based authentication.
- Worked across frontend and backend implementing dashboards, calendar views, admin workflows, analytics visualizations, and leave management modules.
- Integrated Handsontable, Highcharts, Moment.js, and REST APIs to improve maintainability and usability.

PROJECTS

Fenero Capital - AI Powered Capital Advisory Platform (Live Deployment)

- Independently built and deployed a production grade full stack financial advisory platform with 11+ modules.
- Developed 9 internal APIs and integrated Gemini, Groq, and OpenRouter APIs with intelligent failover.
- Engineered Finora AI chatbot for lead generation and financial advisory support using prompt engineering.

AI Based Real Time Attention Monitoring System (GitHub)

- Built a real time computer vision system for monitoring user attention using posture analysis and facial behavior tracking.
- Implemented multimodal feature extraction using OpenCV and MediaPipe.
- Designed a rule based scoring engine for attention classification.

Landslide Detection Using Satellite Imagery (GitHub)

- Developed a computer vision and deep learning pipeline using an 8.97 GB satellite imagery dataset.
- Applied preprocessing, segmentation, and feature extraction for landslide detection.
- Achieved 96.71% training accuracy and 96.51% validation accuracy.

Trip Expense Tracker (Live Deployment)

- Built an expense tracking application for managing and categorizing trip expenditures.
- Implemented transaction tracking, expense categorization, equal or unequal split logic, and financial insights dashboard.

SKILLS

Languages: Python, C++, Java, JavaScript

AI / ML: Machine Learning, Deep Learning, Computer Vision, NLP, TensorFlow, Scikit Learn, OpenCV

Libraries: NumPy, Pandas, Matplotlib, SHAP, LIME

Full Stack: ReactJS, AngularJS, Django, Flask, REST APIs, SQLite, PostgreSQL, Handsonable, Chart.js, Moment.js

Core: OOP, DBMS, Operating Systems, Cloud Computing

EDUCATION

VIT Bhopal University

2023 – 2027

B.Tech in Computer Science Engineering (AI & ML)

CGPA: **8.32 / 10.0**

Class XII: 78.2%

Class X: 87.8%

CERTIFICATIONS

- Applied Machine Learning (University of Michigan) (Certificate)
- Cloud Computing (NPTEL) (Certificate)
- Internet of Things (NPTEL) (Certificate)

LEADERSHIP

Microsoft Technical Club, VIT Bhopal

Dec 2024 – May 2026

***Vice President** — Team Lead, Event Management Team — Core Member, Technical Team*

- Progressed from Core Member to Team Lead and ultimately Vice President, leading cross-functional teams across event management, logistics, outreach, and technical operations.
- Spearheaded the planning and execution of **SIH Success Blueprint**, coordinating with Smart India Hackathon finalists, design teams, and technical teams while managing promotions, speaker onboarding, and event delivery.
- Led stakeholder communication, team coordination, and event operations, ensuring successful execution of technical workshops, community initiatives, and student engagement programs.

VIT Bhopal x Johns Hopkins University HealthHack

February 2026

Team Leader

- Led a team of 6 members in designing and developing **CareFast**, a mobile-first emergency healthcare application focused on rapid access to medical assistance and emergency monitoring.
- Managed product planning, team coordination, and technical decision-making throughout the hackathon lifecycle.
- Advanced to the Final Round among competing teams through solution innovation, execution quality, and presentation effectiveness.
- (GitHub)

Music and Band Club, VIT Bhopal

2024 – 2025

Core Member

- Contributed to the planning, organization, and execution of musical performances, club activities, and campus events.
